

PRODUCT GUIDANCE

MODULAR SHEET TENSIONING BAR

PDG17003-

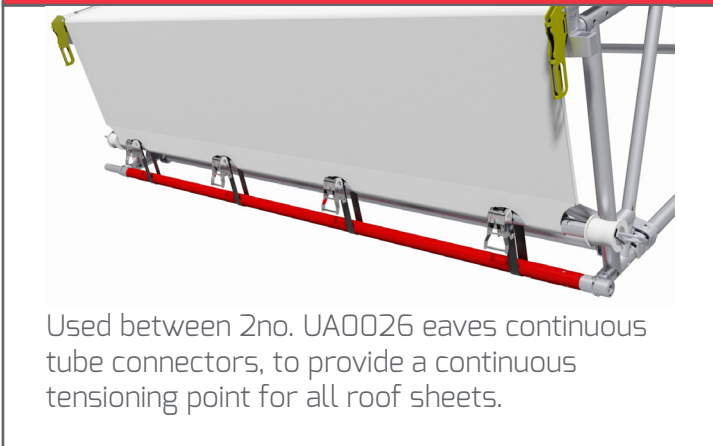

DESCRIPTION AND KEY BENEFITS

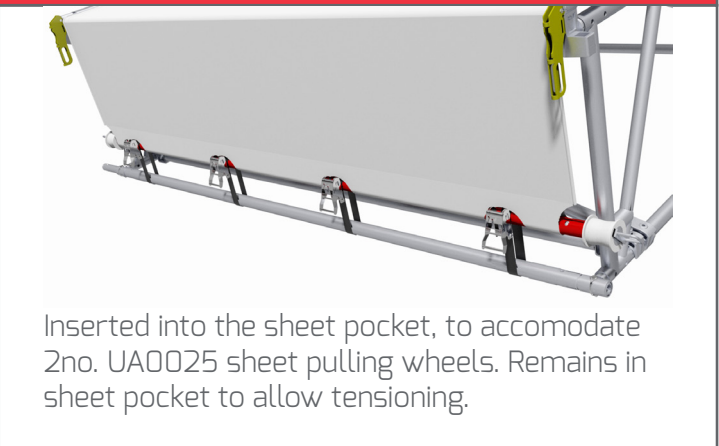

DESSA's new and improved sheet tensioning bar features a host of benefits for onsite and logistical operations:

- Colour coded parts, assisting site use and stock management.
- Made-to-measure part, avoiding the issues of using "cut-to-length" tube.
- Works with Detachable Sheet Pulling Wheel, UA0025 (see PDG16002) for an unrivalled sheet installation experience.
- Integrates seamlessly with Eaves Continuous Tube Connector, UA0026 (see PDG17004) for a neat and consistent finish on roof sheets.

APPLICATIONS

Used between 2no. UA0026 eaves continuous tube connectors, to provide a continuous tensioning point for all roof sheets.

Inserted into the sheet pocket, to accommodate 2no. UA0025 sheet pulling wheels. Remains in sheet pocket to allow tensioning.
